Shield Insurance Business Performance Dashboard

Name: Krishna Kumari Aduri
Internship Project
Tool Used: Power BI
Date: March 30, 2026

The dashboard analyzes key business metrics such as revenue, customers, claims, and regional performance to help businesses make better decisions.

Project Objective

- Analyze insurance business performance
- Monitor revenue growth
- Track customer acquisition
- Evaluate claim ratio and business risk
- Identify high-performing regions and policies

The dashboard helps stakeholders understand important metrics such as revenue, number of customers, claim ratio, and regional performance.

Tools & Technologies

TOOLS USED

POWER BI – DATA VISUALIZATION AND DASHBOARD CREATION

EXCEL – DATA PREPARATION

DAX – CREATING CALCULATED METRICS

DATA MODELING – RELATIONSHIP BUILDING

KPI Overview

Content

Key Performance Indicators

Total Revenue

Total Customers

Claim Ratio

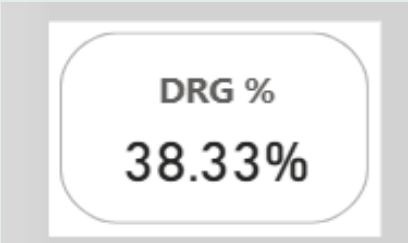
Policy Distribution

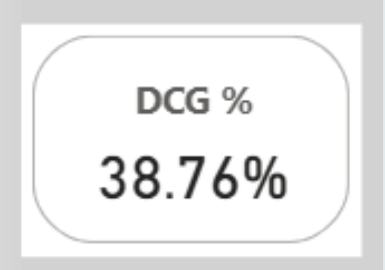
These KPIs provide a quick overview of the company's performance.

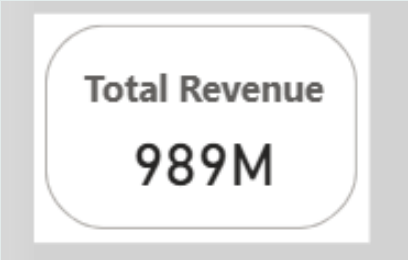
Total revenue represents the income generated from insurance policies.

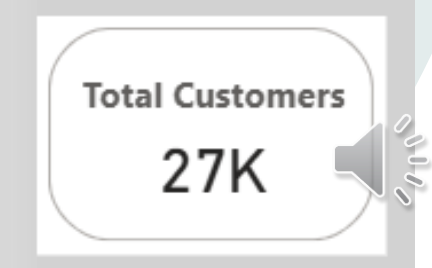
Total customers indicates the number of policyholders.

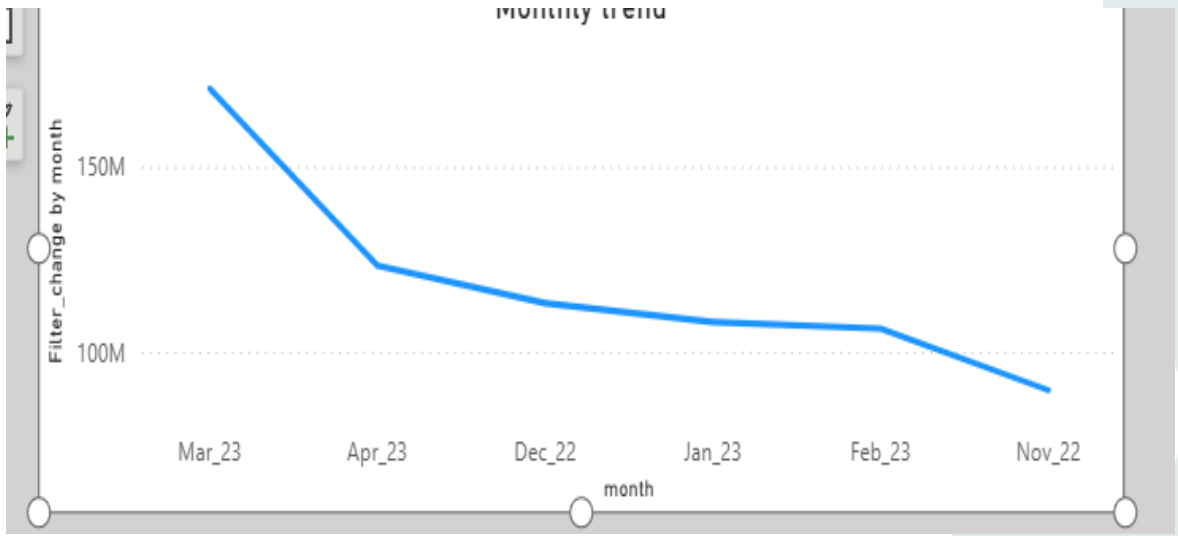
The claim ratio represents the percentage of claims compared to revenue. This is an important metric because it helps evaluate the company's risk exposure."











Revenue Trend Analysis

Monthly Revenue Trend

Insights:

Revenue fluctuates across months

Drop observed after March

Possible seasonal impact

Business Insights

Revenue by Region
Top Performing Policies

Insights:

Some regions generate higher revenue

Few policies drive majority of business

Opportunity to expand in low-performing regions

Revenue Split

city	Total Revenue	Total Customers
Chennai	106M	2966
Delhi NCR	402M	11007
Hyderabad	161M	4340
Indore	81M	2096
Mumbai	240M	6432
Total	**989M**	**26841**

Conclusion
